

REMODELING YOUR HOME? WHERE TO BEGIN

Assess Your Homes Needs and Your Goals

- What needs to be repaired?
- What are the elective repairs/upgrades?

Budget

Phasing your projects can help with spreading out costs.

Prioritize Key Areas

- Start with issues that impact the homes well being and structure.
- Consider alternative materials that are more durable. IE Stucco can be replaced with siding.
- Interior upgrades should begin with high impact areas.

Hire the Right Contractor

Consider:

- Experience with high-value homes.
- Knows zoning laws and ability to abide by historical neighborhood rules.
- A proven track record of quality and happy clients.
